CASTER MAINTENANCE & CLEANING

Caster Maintenance

Perform caster maintenance each time your Ingredient Bin has been washed or steam cleaned.

1. Grease swivel raceway of caster using a lubricant such as Lubriplate #930-AA, Keystone #84EPXLT multi-purpose grease or equivalent. Apply grease using a grease gun with a needle nose adapter or a tube-type applicator such as Sta-lube Moly-graph Assembly Lube (Fig. 1). These can be obtained at most auto parts stores.
2. Use a light oil such as WD-40 on the hub (Fig. 2). Check caster for damage and test caster spin and swivel rotation before returning to service.
